

Exkin[®] OXF

Elementis Pigments is pleased to announce the launch of **Exkin[®] OXF**, an oxime free anti-skinning agent.

Exkin[®] OXF is;

- an oxime free, patent pending, product
- a new product in the area of anti-skinning agents
- comparable to **Exkin[®] 2** (MEKO) in laboratory tests
- highly concentrated
- suitable for use in any oxidative drying system

Exkin[®] OXF has proven, in laboratory tests, that it:

- ✓ is an effective anti-skinning agent in air drying paints
- ✓ is readily miscible with paint, varnish or enamel systems
- ✓ is effective at providing the required skin resistance with a minimal effect on drying
- ✓ does not discolour delicate shades or whites
- ✓ does not impart undesirable film properties

Comparative Testing against **Exkin[®] 2** (MEKO)

Exkin[®] OXF was compared against MEKO for anti-skinning performance and the effects on drying, hardness and colour. In different systems named below **Exkin[®] OXF** gave, on average, longer anti-skinning performance:

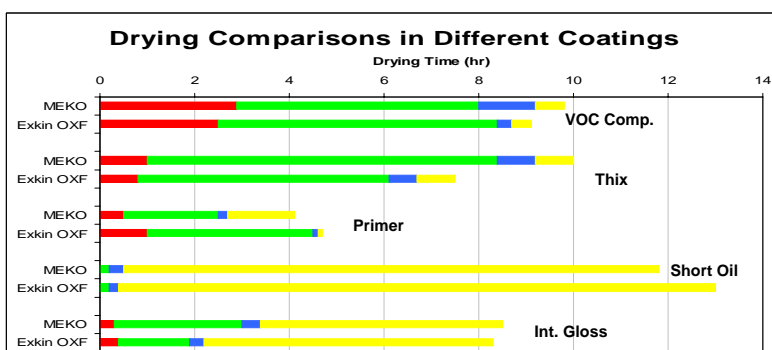

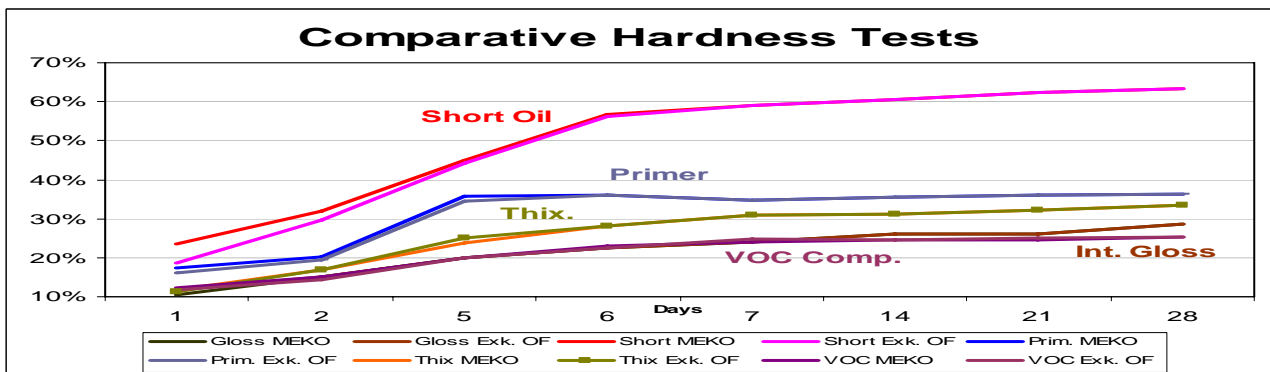

Interior Gloss – 13%

Short Oils – 30%

2010 VOC Compliant systems – 33%

Primers – 9%

Woodstains – 15%
